MARCONI CO. OFFICIALS PRAISE WIRELESS TYROS

the Host of Amateurs Should Be Encouraged.

SLUR ON CALIBRE IN NAVY

Declares Men Direct from Government Service Lacking in First Class Operating Ability.

John Bottomley, vice-president and gen eral manager of the Marconi Wireless Tele effect whatever upon the wireless transmission to or from the Cunard liner Car pathia, which brought to port the Titanic's It had been difficult to get much information from the Carpathia after she picked up the Titanic's passengers from the liner's lifeboats on Monday morning, but the short range of her instrument at first and later the exhausted condition of the ship's operator caused by the great bulk of service business put upon him were responsible for the delay in getting news

Mr. Bottomley declared that the Marconi system had attained such a state of perfection in its operators and its attunement that it could not be affected by interfer-

"The man who complains of interference, he said, "is usually a poor operator. Our men do not complain at all. Amateurs are and to be interferers with regular business; also to be aggressors in sending out false reports. We admit, frankly, that amateurs, of which, we are informed, there are about a thousand in and around New York, have interfered with us. No fake report has ever been foisted upon us, both of which circumstances we attribute to the class of operator which we employ, as a skilled operator can readily, if provided with proper apparatus, cut out amateur interference and the touch of the key to an experienced operator will disclose an amateur sending.

Little Skill in the Navy.

"A great deal of the trouble, in my opin ion, and in the opinion of our chief engineer, is caused by the fact that the operators employed by the navy are, although operators.' In fact, during the last year we port that, aside from the loss of its records have examined many men whose terms of and the inconvenience caused thereby, the enlistment had expired and who wished to pecuniary loss from the fire which dejoin this company, but in only one in- stroyed the Equitable home office in New stance have we been able to take on any York last January was insignificant. of the men as skilled operators. Moreover, operators many of its troubles would dis- says that, "although the society's account

sances of themselves, should be encouraged. loss when the home office building was de-There may be lurking among them a Mar- stroyed. coni or a Lodge, and they should have a chance to work out their salvation. But taken to meet the department's recomagain the wave length comes in, and the mendations that the "society's expense and amateurs should be restricted to the use not only of very low powered apparatus,

restricted wave length."

Concerning the wireless equipment of the Titanic, Mr. Bottomley said: "She had the finest that is made, and storage batteries that would keep her instruments going for at least eleven hours if the feed from the Patrolman Tries in Vain to Save Life Avnamos should give out. Also she was prepared to operate it by a small donkey engine, in which steam could be made in

Deny Choatic Conditions. the wireless conditions as they actually man: existed in connection with the sinking of the Titanic and the rescuing of her sur-

out of commission, Arrangements were made to place the auxiliary storage battery set in operation. By this time the vessel was sinking so rapidly that the Marecni men were told by the captain to look out for themselves, and it will be noted from the press that while actually engaged in their work they were compelled to fell a fireman who entered the room and at-

tempted to interfere. The log of the Titanic, which unfortunately was not saved, but which I have re ceived verbally from the operator, shows amunication was instantly estab lished with several ships, and that com unication continued up to the very last. After the Titanic man had been taken on board the Carpathia and placed in the hospital for treatment of his injured feet here he remained for some ten or twelve hours. It will be seen, therefore, that th quired to handle all of the business, and strictly in accordance with rules and regupresent personal telegrams priority. Press matter is never attended to until the above named business is cleared. Owing to the thousands of messages offered for trans mission to the ship and the hundreds of passengers' telegrams filed for transmission from the ship, at no time was the cir cuit sufficiently clear to accept or transm first Carpathia man began to feel the strain of the work the second Titanic operator was brought up from the hospital and placed so that he could handle the circuit, in order to allow the regular Carpathia telegrapher to obtain much needed rest."

AUTO KILLS BICYCLIST

Says Husband Had Premonition He Would Meet Accident.

John Swift, seventy-four years old, ar engineer, of No. 120 Lawrence street, riding a bleycle, was instantly killed yesterday when he attempted to turn from Riverside Drive north into 12th street, being struck by a large touring car driven by Glovannt Colletel and owned by Harold Walker, of No. 264 Riverside Drive.

The chauffeur had tried also to make the turn, and had been forced out from the M. curb. The mudguard of the car struck the bicyclist, who was then crushed by the car, had to be assisted to a nearby house

to recover from the shock. According to Mrs. Swift, her husband had premonition yesterday morning that an secident would befall him, and in order to nake his identification possible had written his name and address on a silp of paper searched by the police of the West 125th |

CONTROLS \$17,000,000,000 Stanley Report Shows the Vast Financial Power of U. S. Steel.

[From The Tribune Bureau.] Washington, April 21 .- Preliminary to the eport of the Stanley steel investigation mittee, R. W. Woolley, employed as

special investigator, made public to-night Vice-President Bottomley Says a statement intending to show that the United States Steel Corporation or its directors exert a dominating influence over the principal railroads, industrial corpora tions, banks and insurance companies in the United States. These directors are declared to have a powerful voice in the control o more than \$17,000,000,000 of capital, This phase of the relations of the "stee

rust" to the other large corporations of the country is not the discovery of the Stanley committee. It is dealt with extensively in the bill filed by the depart ment against the Steel Corporation unde the subject of interlocking directorates. The figures in the statement, which will e included in the committee report, are stupendous in point of magnitude. It is

clared that the total capitalization and conded indebtedness of the railroads in which the "steel trust" directors are officers and directors amounts to \$10,365,071,833. The total capitalization and bonded in debtedness of all railroads in the United States is given at approximately \$18,300, also control more than haif of the railroad

properties in the country. Giving the capitalization of more than fifty of the greatest industrial concerns in the United tates, including gas, coal, oil, realty, chemical and power companies, the

realty, chemical and power companies, the report states that officers and directors of the United States Steel Corporation are also officers and directors of industrial concerns, with a total capitalization and bonded indebtedness of \$2.80.50,345.

Proceeding to the alleged steel trust domination of banks, trust companies and life and fire insurance companies, the statement declares that "The officers and directors of the United States Steel Corporament declares that "The officers and di-rectors of the United States Steel Corpora-tion are also officers and directors in banks, trust companies, life and fire in-surance companies, whose aggregate capital surplus and deposits amount to \$3,314,811,-

Steel trust officials are also shown to be officers or directors of street railways, ter-minal, steamship, express and telegraph ompanies, with an aggregate capitaliza-on and bonded indebtedness of \$1,271,778.

Of the individual officers or directors, George F. Baker holds the greatest number of memberships in other boards of directors. Mr. Baker is a director in industrial corporations with a combined capital of nearly \$2,000,000,000; railroad and express companies, with capital of more than \$4,000,000,000, and banks with capital of more than \$1,500,000,000.

robbed by three masked men who went through the sleeper Nottingham, of the Rock Island westbound Golden State this morning, at Sheffield, Ill., forty miles east of Moline.

After the robbers had finished their bringing the train to a standstill and quickly made their escape.

Under cover of three revolvers the porter was forced to point out to the outlaws the berths that were occupied. As soon as the robbers entered the Pullman they forced the porter to lock the doors. Only the occupants of one Pullman were disturbed.

Among those who were robbed are: W. L. Le Blanc, New York, \$45 and

allroad ticket.
Mary Herron, Chicago, \$96.
O. L. Benton, Oberlin, Kan., gold watch and diamond valued at \$150, and \$250

D. A. MacFuller and wife, Fort Wayne, Ind., \$95 and two watches, valued at J. B. Gomand, Phoenix, Ariz., \$85.

The presence of the three robbers on the train has not been accounted for. It is thought perhaps the men boarded the limited at the crossing of the Chicago, Burlington & Quincy Railroad. near which a Burlington train was held up some time ago

After the desperadoes had taken their tle." loot they commanded the porter to pull distillations of corn, rye and boot leather the air tube as a signal for the engineer to stop the train. When the porter denurred the men punctured the tube with bullets from their pistols. The firing of the "belt. the revolvers was the only noise connected with the hold-up.

It was stated at the general offices of the Rock Island here to-day that a good description of the outlaws was obtained and it was further said there was hope of running them down.

REPORT COAL SETTLEMENT News Received in Anthracite Region with Rejoicing.

By Telegraph to The Tribune Wilkes-Barre, Penn., April 21.-A report that the sub-committee of the mine workers and the coal operators had agreed or the concessions to be given the miners was received throughout the anthracite region to-day with a great deal of satisfaction l mine workers, coal company officials and business men.

of New Jersey Man.

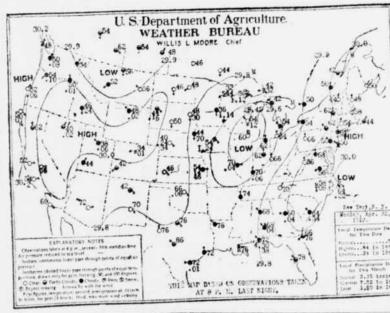

"Two been drinking," said a well dressed man about thirty years old who approached Patrolman Lehane at 52d street and Eighth avenue last night. The patrolman detected the color of application of the union dues by the check-off system by the coal companies, still they considered the reported offer of a 10 per cent increase in wages, an eighthous color of application and asked the union as a decided victory.

arrown, he said, that the wireless conditions were chaotic during the time of the disaster, made it necessary in justice to the company that the actual wireless conditions should be fully explained. He said.

They have had an opportunity of discussing the situation at length with Haroid Bride, the second Marconi telegrapher of the littanic, it develops that the Titanic wireless equipment (the finest and most complete afout) was kept in constant use until the boat deck was awash or at least that pertion of it near the Marconi cabin which was well forward, when the ships dynamos went out of company when the ships dynamos went out of company that the actual wireless conditions along the last that the man was dead.

Mrs. Frederick Meis Demands \$50 a Week from Him.

HE INHERITED \$100,000

QUITS HER BOY HUSBAND

Bride 25 and Bridegroom 19 Come to Sudden End of Summer Romance.

Married six months ago, love's young dream came to an abrupt end for Frederick Meis, nineteen years old, heir to an estate valued at \$100,000, when a few days ago his bride quit their apartments in No. 907 Hancock street, Brooklyn, and through her atorney, Charles E. Hunter, of Hunter & Hatch, of No. 5 Beekman street, Manhattan, had papers in a suit for separation erved on the bridegroom. Mrs. Meis's maiden name was Annie

Stumpf, and the couple were married Octoer 15 last, after a romantic courtship in Y., where young Meis was Ancona spending his vacation on his farm. Mrs. Brazos Mels is twenty-five years old. Nothing was known of the marriage until one day young Meis made application to Surrogate Daniel Noble of Queens County to have his uncle, his guardian and his bride named instead. Young Mels set forth that his uncle did and appoint the bride guardian in his stead. Patrolmen Kohler and Young, of the East He suggested instead that they had better 2d street station, were at 17th street and wait until the waning of the honeymoon corralled the two.
